The TCA Manual, a publication of the Tissue Culture Association, Inc., is devoted to the advancement and dissemination of basic and applied knowledge by publishing techniques, methods and procedures for the cultivation of cells, tissues, organs, or tumors from multicellular animals or plants. The TCA Manual is published quarterly, one volume per year. The subscription price is $35.00 per volume (domestic). Single copies are $10.00 (domestic). Regular members of the Tissue Culture Association may receive the TCA Manual at the reduced rate of $25.00. Correspondence relating to subscriptions, nonreceipt, reprints, defective copies, availability of back issues, advertising, and late or lost proofs should be directed to the Business Office, 12111 Parklawn Drive, Rockville, Maryland 20852 (Area Code 301 881-8146). Application to mail at Second Class Postage Rates pending at Rockville, Maryland 20852.

TISSUE CULTURE ASSOCIATION MANUAL

NOTICE TO CONTRIBUTORS

1. The Tissue Culture Association Manual is published quarterly by the Tissue Culture Association, Inc. and represents the contributions of investigators in the field of cell, tissue and organ culture. The Manual publishes papers representing techniques, methods and procedures developed in the course of studies with vertebrate, invertebrate and plant culture. Manuscripts should be mailed to:

   Tissue Culture Association Manual
   c/o Biomedical Research Institute
   12111 Parklawn Drive
   Rockville, Maryland 20852

2. Each contribution must have a descriptive title not to exceed fifteen words. The title should be followed by the legend "Submitted by," name(s) of the author(s), and the institutional address. Identify as page 1.

3. Each contribution must have an introduction and be identified as: I. INTRODUCTION. The introduction should be brief, yet comprehensive, and include any special instructions, such as CAUTIONS, that the reader should follow. Begin INTRODUCTION on page 2.

4. Each contribution must have a materials section identified as: II. MATERIALS. The materials section should list all items to be used in the technique, method or procedure and include a description of the item, a stock or catalogue number and identification of the manufacturer or supplier with a footnote address (the list of footnote addresses should be on a separate page). For example:

   Pipettes, serological 5 ml, No. xxxx Corning[3]

5. Each contribution must have a procedure section identified as: III. PROCEDURE. The procedure should be written in the present tense, imperative mood, and should itemize and describe each step to be taken. The stepwise description of this section should be explicit and in such detail that the novice could successfully follow the procedure and duplicate the results of the author(s).

6. Each contribution must have a discussion section identified as: IV. DISCUSSION. The discussion should include a description of what can be expected from following the procedure, the role of the procedure in a specific or potential application, and any precautions that should be exercised (for example, in the interpretation of results).

7. Each contribution should have a reference section identified as: V. REFERENCES. References must be cited in the text in numerical sequence and listed in Reference section in the order first cited. References should follow the same style as published in the journal IN VITRO. For example:

   1. Danes, B. S., and A. G. Bearn. 1966. Hurler's syndrome: a genetic study in cell culture. J. Exp. Med. 123: 1-16.
   2. Price, P. J. 1975. Preparation and use of rat-tail collagen. Procedure 71118. TCA Manual 1: 43-44.
   3. Harris, M. 1964. *Cell Culture and Somatic Variation.* Holt, Rinehart and Winston, New York, pp. 233-241.
   4. Trowell, O. A. 1966. Tissue culture in radiobiology. In: E. N. Willmer (Ed.), *Cells and Tissues in Culture. Methods, Biology, and Physiology.* Volume 3. Academic Press, London, pp. 63-149.

8. Each manuscript is to be submitted in an original plus two (2) copies. The first page should include only the title, author(s) and institutional address and should be identified as page 1. Each section, i.e., I. INTRODUCTION, II. MATERIALS, III. PROCEDURE, IV. DISCUSSION and V. REFERENCES should begin on a separate page. Each manuscript should be typewritten double-spaced, with 1" margins on the right and left and 1-1/2" at top and bottom of each page.

9. The cost of all illustrations, including line drawings, photographs and other art forms, must be borne by the author and should be included only where and when absolutely necessary. The charge for black and white illustrations has been set at $50.00 per page, regardless of size.

10. Subscription rates: Members of the Tissue Culture Association — $25.00 per volume. Non-members — $38.00. Postage and handling charges included. No discounts to agents.

11. All inquiries regarding manuscripts, subscriptions, advertising, etc., should be directed to:

    Tissue Culture Association Manual
    12111 Parklawn Drive
    Rockville, Maryland 20852
    Telephone Area Code (301) 881-8146.

Mention of a proprietary product does not necessarily constitute an endorsement of the product by either the author or the Tissue Culture Association. Product sources are given only to indicate what product the investigator used in his particular procedure and to aid the novice in locating a source, or THE source should the novice wish to repeat the procedure exactly.

TABLE OF CONTENTS

Procedure Number	Title	Page Number
40561	Cell Fusion. *Submitted by Albert Deisseroth*	257
41175	Cellophane Sandwich Explant System. *Submitted by Ruth Cole and Jean de Vellis*	261
43361	Culturing on a Gas-Permeable Membrane. *Submitted by Mona D. Jensen*	265
46135	Primary Explantation of Normal and Neoplastic Mammary Epithelium. *Submitted by E. Y. Lasfargues*	269
46137	Processing of Human Tissue to Establish Primary Cultures in Vitro. *Submitted by Debi A. Riegner, Thomas McMichael, Jack C. Berno and George E. Milo*	273
46185	Simple Enzymatic Procedure for Preparation of Cell Dispersions of Mammalian Soft Tissue. *Submitted by L. V. O'Brien and K. A. Gruber*	277
46375	Isolation of Rat Prostate Cell Cultures by Physical Dissociation. *Submitted by Neil I. Goldstein and Paul B. Fisher.*	281
53362	Ligand-Mediated Osmium Binding: Its Application in Preparing Cultured Cells and Tissues for Scanning Electron Microscopy. *Submitted by Robert O. Kelley*	285
61134	Method for Preparing Chromosome Spreads of Glass-Attached Cultured Animal Cells. *Submitted by Carter B. Schroy and Paul Todd*	287
61196	Use of Cultured Cells for in Situ Measurement of Lysosomal Fragility. *Submitted by Duane G. Wenzel and Barry L. Reed*	291
71682	Use of Plant Cell Suspension Cultures in Studies of the Metabolism of Pesticides or Other Foreign Chemicals. *Submitted by Raymond K. Locke*	295
73654	Tumorigenicity Assays Using Antithymocyte-Treated Newborn Hamsters. *Submitted by J. C. Petricciani and R. E. Wallace*	303
75394	Simple, Rapid Method for Detecting Mycoplasma Contamination. *Submitted by Barbara G. Becker and Elliot M. Levine*	305
76035	Simple Method for Freezing and Thawing Cultured Cells. *Submitted by Carter B. Schroy and Paul Todd*	309
76165	Simple Freezing Procedure for Storage in Serum-Free Media of Cultured and Tumor Cells of Mouse. *Submitted by Charity Waymouth and Don S. Varnum*	311
78194	Cloning of Cells from Mouse Blastocyst Derived Cultures. *Submitted by Michael I. Sherman*	315

TISSUE CULTURE ASSOCIATION MANUAL
Techniques, Methods and Procedures for
Cell, Tissue and Organ Culture

Volume 2 Number 2 1976

TABLE OF CONTENTS

Procedure Number	Title	Page Number
36555	Tissue Culture Medium and Cockroach Ringer for the Cockroach *Periplaneta Americana.* *Submitted by K. R. Seshan*	319
38141	Human Plasma in Tissue Culture — Its Collection and Preparation. *Submitted by Machteld E. Sano*	323
41514	Cultivation of Tissue and Cell Cultures of Human Skeletal and Soft Tissue Tumors. *Submitted by A. Neri and W. D. Winters*	327
43321	Techniques for Establishing Tracheal Organ Cultures. *Submitted by Albert M. Collier*	333
46125	Preparation of Monocellular Dispersions of Mammalian Neoplastic Cells from Solid Tumors. *Submitted by John M. Nelson*	335
46144	Isolation of Rat Prostate Cell Lines by Enzymatic Dissociation. *Submitted by Neil I. Goldstein and Paul B. Fisher*	341
46182	Improved Method for the Cell Dispersion of Tissue in Trypsin-Citrate Solution. *Submitted by W. Parisius, N. B. Cucakovich, H. G. Macmorine, A. L. Van Wezel and P. A. Van Hemert*	345
49194	Method for Isolating Individual Cells from Heterogeneous Monolayer Cultures. *Submitted by Julie Morgan, Mark Levin, Stephen Bittner and Louis Cohen*	349
51223	Use of Gelatin Capsules in Mounting Organ Culture Explants for Cryostat Sectioning. *Submitted by Richard C. Klann and Theodore V. Fischer*	353
61154	Combination G Banding Technique. *Submitted by Kathryn J. Parks and Morton A. Stenchever*	355
71583	Monitoring Hormonal Induced Changes in Cholesterol Synthesis in Cell Culture. *Submitted by Neil I. Goldstein and Paul B. Fisher*	359
74154	Quantitation of Membrane Damage by ^{51}Cr Release. *Submitted by Paul B. Fisher*	363
74378	Fractionation of Human Cultured Lymphoblasts into Cell Cycle Phases by Velocity Sedimentation in Density Gradients. *Submitted by L. M. Jerry, A. K. Sullivan, L. S. Adams and R. Turner*	367
75354	Simple Biochemical Method for the Detection of Mycoplasmas and Other Microbial Contaminants of Cell Cultures. *Submitted by Eric J. Stanbridge and Edward L. Schneider*	371
75443	Microtissue Culture Technique for the Assay of Antibacterial Immune Sera. *Submitted by F. E. Ashton, R. Wallace and B. B. Diena*	375

TABLE OF CONTENTS

Procedure Number	Title	Page Number
10311	Cleaning and Preparation of Glassware for Cell Culture. *Submitted by Floyd M. Price and Katherine K. Sanford*	379
15143	Some Guidelines for Selection of Antibiotics for Elimination of Unwanted Microbial Contaminants in Tissue Cultures. *Submitted by D. Perlman*	383
18192	Storage of Microsporophylls (Anthers) of *Pinus Resinosa* *Submitted by J. M. Bonga*	387
25043	Economical Roller-Bottle Apparatus for Animal Cell Culture. *Submitted by Frederick R. Ball, George Sanders and Edward L. Medzon*	389
30934	Standardization of a Substrate, Stabilization and Assay of Pancreatin (Crude Trypsin 1:300, 1:250 etc.) Solution. *Submitted by G. M. Healy and H. G. Macmorine*	393
38095	Serum Preparation for Nutritional Studies. *Submitted by M. D. Maxwell, E. Conway and M. K. Patterson, Jr.*	397
41518	Use of "Bottomless-Bottle" for Isolation of Human Endometrial Cells. *Submitted by Tohru Okigaki*	403
42543	Establishment of Animal Cell Cultures Using Plasma Clot Attachment of Small Tissue Pieces to Glass. *Submitted by David Pye and Andrew MacGregor*	405
43122	Raft Cultures. *Submitted by William H. J. Douglas and Raymond H. Kahn*	409
67253	Staining of Pollen and Callus of *Pinus Resinosa* in Lacto-Propiono-Dimethylsulfoxide Carmine (LPDC). *Submitted by J. M. Bonga*	411
70763	Evaluation of Antiviral Compounds by the Use of Persistently Infected Cell Cultures. *Submitted by W. Schwoebel and G. Streissle*	413
73348	Serologic Identification of the Species of Origin of Cells in Tissue Culture by Means of the Mixed Hemadsorption Reaction. *Submitted by Rolf F. Barth and Gary W. Wood*	415
73481	Lymphocyte Transformation in Short-Term Cultures: Microculture Technique and Semi-Automated Quantitation. *Submitted by Alan Sharp and Barbara Bain*	419
73942	Paired Label Assay for Cell Surface Antigens. *Submitted by Stephen J. O'Brien, Charles W. Boone, Janice M. Simonson and Faye C. Austin*	423
74442	Procedure for Demonstrating Cell to Cell Transfer of Macromolecules. *Submitted by Gerald M. Kolodny*	429
74474	Isolation of Cell Surface Membranes. *Submitted By Jennie C. Lasfargues*	433
75358	New Quick Screening of Mycoplasma Contamination in Cell Culture by Adenine Detection. *Submitted by Masakazu Hatanaka, Richard delGuidice and Cedric Long*	437
